Vibe Swipe

App Store Connect Action Guide — Payment Compliance

Prepared for Bryan — September 20, 2026

Hi Bryan,
Apple has placed the App Store review on hold under **Guideline 2.1(b)** to verify our in-app payment model. Because Vibe Swipe offers **Live Stream Tickets** and **Super Chat tips**, Apple requires that all in-app digital payments use **Apple In-App Purchases** with fixed pricing tiers (Stripe is not permitted by Apple for digital content on iOS).

Our development team is updating the app code. Below are the **2 exact steps you need to complete in your App Store Connect account** to unblock the submission.

STEP 1 — PRIORITY Activate "Paid Applications Agreement" (Banking & Tax)

Apple cannot approve or activate In-App Purchases until you (the Account Holder) sign the commercial agreement to receive payouts from Apple:

Follow these exact steps in App Store Connect:

1. Log in to App Store Connect with your Apple ID.
2. On the main dashboard, click on **Agreements, Tax, and Banking**.
3. Under the **Paid Apps** section, click **View and Agree to Terms** (or **Set Up**).
4. Complete the required financial details:
   - **Bank Account:** Enter the bank account where Apple will deposit in-app purchase earnings (Apple pays 70% to 85% net).
   - **Tax Forms:** Complete the standard US / International tax questionnaire (e.g. W-9 / W-8BEN).
   - **Contacts:** Provide contact details for Legal, Finance, and Management.
5. Click **Submit**. The agreement will change to *Processing* or *Active*.

REFERENCE Standardized In-App Pricing Tiers (For Apple Compliance)

Apple requires fixed price tiers (users cannot type arbitrary custom decimals). Our team will set up these standard tiers in App Store Connect once Step 1 is active:

FEATURE	STANDARD FIXED TIERS	APPLE PRODUCT TYPE	PAYOUT TO VIBE SWIPE
Live Stream Tickets	Tier 1 ($1.99) | Tier 2 ($4.99) | Tier 3 ($9.99) | Tier 4 ($19.99)	Non-Renewing / Consumable	~70% - 85% Net
Super Chat Tips	Bronze ($1.99) | Silver ($4.99) | Gold ($9.99) | Platinum ($24.99)	Consumable Tip Badge	~70% - 85% Net

STEP 2 — IMMEDIATE Submit the Business Model Reply to Apple App Review

Apple's reviewer asked 6 specific questions regarding our business model (see screenshot below). We have prepared the exact, compliant answers for you to submit:

How to submit this in App Store Connect:

1. Go to **Apps** → **Vibe Swipe App** → **Distribution** (or click on the pending submission).
2. Scroll down to the bottom of Apple's message and click the blue **"Reply to App Review"** button.
3. Copy and paste the exact pre-written responses from the green box below into the message field.
4. Click **Send**.

COPY & PASTE THESE ANSWERS INTO "REPLY TO APP REVIEW":

1. Who are the users that will use the paid subscriptions in the app?

Vibe Swipe does not offer recurring subscriptions. Users are music fans who purchase one-time event tickets to watch specific live-streamed performances by artists.

2. Where can users purchase the subscriptions that can be accessed in the app?

Directly inside the iOS application using Apple In-App Purchase.

3. What specific types of previously purchased subscriptions can a user access in the app?

None. There are no recurring subscriptions or previously purchased subscription tiers.

4. What paid content, subscriptions, or features are unlocked within the app that do not use In-App Purchase?

None. All in-app digital content, live stream admissions, and artist tips on iOS will exclusively use Apple In-App Purchase.

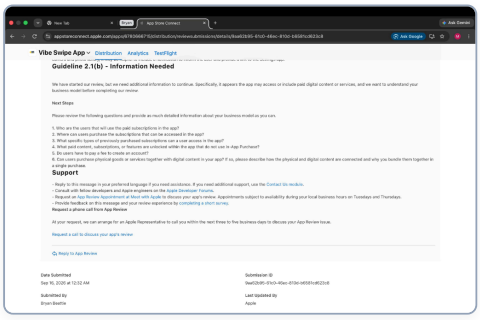

5. Do users have to pay a fee to create an account?

No. Account creation and general app browsing are 100% free.

6. Can users purchase physical goods or services together with digital content in your app?

No. There are no physical goods or bundled purchases offered in the app.

Optional: If you prefer our development team to submit the review response and configure in-app products directly, please ensure our developer account has **Admin** or **App Manager** role under *Users and Access*.
Please let us know once Step 1 and Step 2 are completed so we can upload the finalized build for immediate approval.
Thanks, **Vibe Swipe Development Team**
