Vibe Swipe

App Store Review Feedback & Required Client Actions

Prepared for Bryan — September 20, 2026

Hi Bryan,

Apple has completed their initial review of **Vibe Swipe (Build 1.0.18)** and sent feedback regarding two specific items: (1) Camera & Photo permission behavior, and (2) our business model regarding in-app digital payments.

Our development team is already handling the code updates. Below is a simple, non-technical breakdown of what Apple asked, how we are resolving it, and the **exact actions required from your side in App Store Connect**.

---

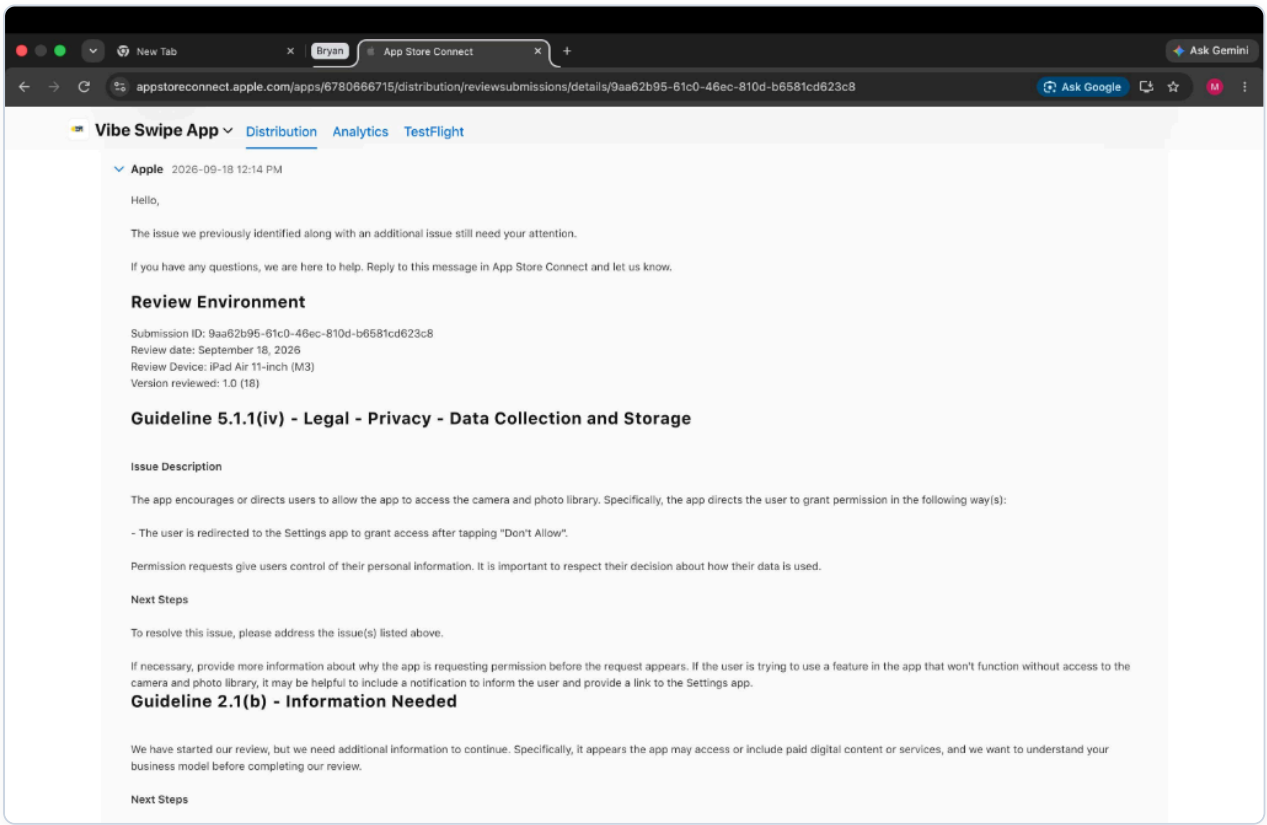

1. Camera & Photo Library Permissions (Guideline 5.1.1)

Apple noted that when a user taps "Don't Allow" on camera or photo permissions, the app automatically redirects them to the iOS Settings app. Apple's guidelines require apps to respect the user's initial choice without forcing or redirecting them to Settings.

Development Team Action We are modifying the permission flow in the app code so it gracefully respects "Don't Allow" without redirecting the user.

Client Action **None required.** This is a purely technical fix being completed by our development team.

App Store Connect Feedback — Guideline 5.1.1(iv) Camera & Photo Library

2. In-App Digital Payments & Fixed Pricing (Guideline 2.1b & 3.1.1)

Apple strictly mandates that any in-app digital service (such as **tickets to watch live streams** and **Super Chat tips**) must use **Apple's native In-App Purchase system** instead of external processors like Stripe. Apple also requires all in-app items to have **predefined fixed price tiers** (users cannot enter arbitrary open amounts into Apple checkout).

We have structured the pricing into simple standard tiers:

FEATURE	STANDARD TIERS	APPLE IN-APP PURCHASE TYPE
Live Stream Tickets	**Tier 1:** $1.99 | **Tier 2:** $4.99 | **Tier 3:** $9.99 | **Tier 4:** $19.99	Non-Renewing / Consumable
Super Chat Tips	**Bronze:** $1.99 | **Silver:** $4.99 | **Gold:** $9.99 | **Platinum:** $24.99	Consumable Tip Badge

Development Team Action We are connecting Apple's native StoreKit payment flow directly in the Flutter app to support these tiers.

Required Client Action **Please activate the Paid Applications Agreement in App Store Connect:**

1. Log in to App Store Connect.
2. Click on **Agreements, Tax, and Banking**.
3. Under Paid Apps, click **View and Agree to Terms**.
4. Add your company/individual **Tax Information** and the **Bank Account** where Apple will deposit your earnings.

**Apple requires this agreement active before in-app purchases can be enabled or reviewed.*

---

3. Apple Business Model Questions (Ready to Submit)

Apple asked 6 specific business model questions in App Store Connect. We have drafted the exact, compliant answers for you below:

1. Who are the users that will use the paid subscriptions in the app?

> "Vibe Swipe does not offer recurring subscriptions. Users are music fans who purchase one-time event tickets to watch specific live-streamed performances by artists."

2. Where can users purchase the subscriptions that can be accessed in the app?

> "Directly inside the iOS application using Apple In-App Purchase."

3. What specific types of previously purchased subscriptions can a user access in the app?

> "None. There are no recurring subscriptions or previously purchased subscription tiers."

4. What paid content, subscriptions, or features are unlocked within the app that do not use In-App Purchase?

> "None. All in-app digital content, live stream admissions, and artist tips on iOS will exclusively use Apple In-App Purchase."

5. Do users have to pay a fee to create an account?

> "No. Account creation and general app browsing are 100% free."

6. Can users purchase physical goods or services together with digital content in your app?

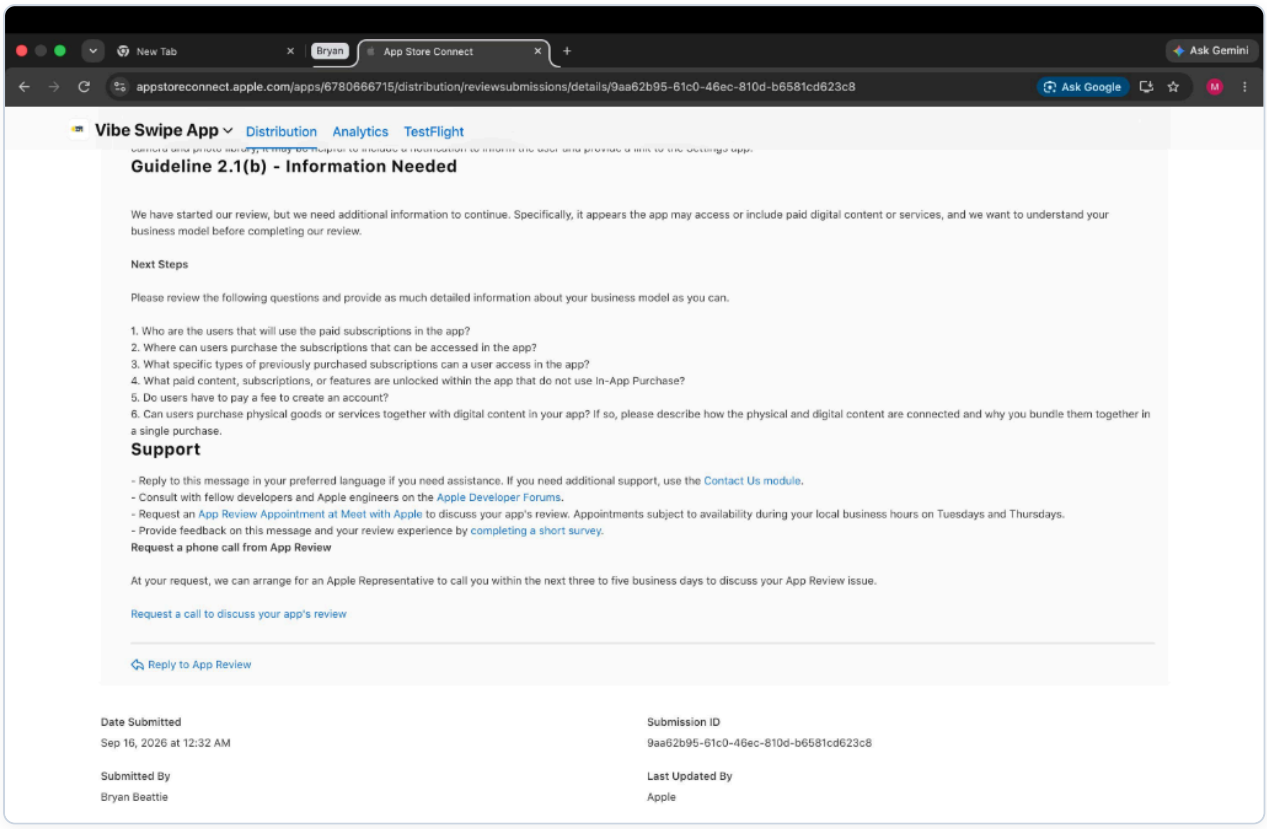

> "No. There are no physical goods or bundled purchases offered in the app."

Client Action You can copy and paste the above 6 answers directly into the **"Reply to App Review"** box in App Store Connect (or grant our team Admin access to submit it for you).

App Store Connect Feedback — Guideline 2.1(b) Business Model Questions

Next Steps:
1. Once the **Paid Applications Agreement** is signed and bank/tax details are added, our team will configure the In-App Purchase items.
2. We will submit the updated build addressing the permission behavior along with the questionnaire response.

Please let us know once the agreement has been accepted so we can proceed with the submission immediately.

Thanks,
Vibe Swipe Development Team
