Vibe Swipe

Apple In-App Payment Compliance & Client Action Items

Prepared for Bryan — September 20, 2026

Hi Bryan,

Apple has paused the review of **Vibe Swipe (Build 1.0.18)** under **Guideline 2.1(b)** to clarify our business model regarding paid digital features.

Because Vibe Swipe offers **Live Stream Tickets** and **Super Chat tips**, Apple requires that all in-app payments use **Apple's native In-App Purchase system** instead of Stripe. Below is a simple summary of the pricing structure, the answers ready for Apple, and the quick action needed on your App Store Connect account.

---

1. Standardized Pricing Tiers (Apple Compliance)

Apple does not allow users or artists to enter custom open amounts during checkout. All digital items must have predefined fixed price tiers:

FEATURE	STANDARD TIERS	APPLE IN-APP PURCHASE TYPE
Live Stream Tickets	**Tier 1:** $1.99 | **Tier 2:** $4.99 | **Tier 3:** $9.99 | **Tier 4:** $19.99	Non-Renewing / Consumable
Super Chat Tips	**Bronze:** $1.99 | **Silver:** $4.99 | **Gold:** $9.99 | **Platinum:** $24.99	Consumable Tip Badge

Development Team Action We are implementing Apple's official StoreKit payment flow directly in the Flutter app to handle these tiers.

Required Client Action **Activate the Paid Applications Agreement in App Store Connect:**

1. Log in to App Store Connect.
2. Click on **Agreements, Tax, and Banking**.
3. Under Paid Apps, click **View and Agree to Terms**.
4. Add your company/individual **Tax Information** and the **Bank Account** where Apple will deposit your earnings.

**Apple requires this agreement active before in-app purchases can be tested or approved.*

---

2. Apple Business Model Questions (Ready to Submit)

Apple asked 6 specific questions in App Store Connect. We have prepared the exact compliant responses for you below:

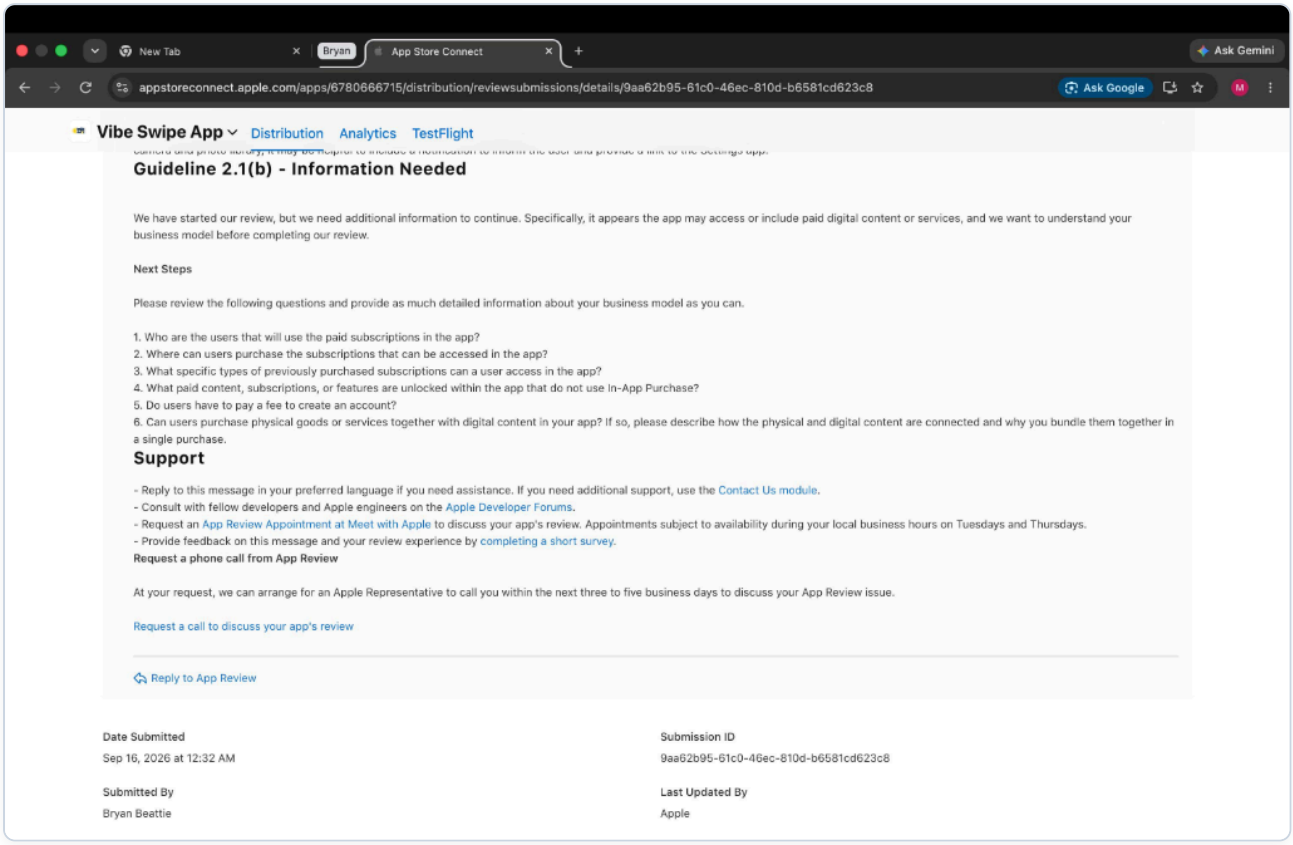

1. **Who are the users that will use the paid subscriptions in the app?**
   > "Vibe Swipe does not offer recurring subscriptions. Users are music fans who purchase one-time event tickets to watch specific live-streamed performances by artists."
2. **Where can users purchase the subscriptions that can be accessed in the app?**
   > "Directly inside the iOS application using Apple In-App Purchase."
3. **What specific types of previously purchased subscriptions can a user access in the app?**
   > "None. There are no recurring subscriptions or previously purchased subscription tiers."
4. **What paid content, subscriptions, or features are unlocked within the app that do not use In-App Purchase?**
   > "None. All in-app digital content, live stream admissions, and artist tips on iOS will exclusively use Apple In-App Purchase."
5. **Do users have to pay a fee to create an account?**
   > "No. Account creation and general app browsing are 100% free."
6. **Can users purchase physical goods or services together with digital content in your app?**
   > "No. There are no physical goods or bundled purchases offered in the app."

Apple In-App Payment Compliance & Client Action Items (Page 2)

Client Action Please copy and paste the 6 answers from Page 1 into the **"Reply to App Review"** message box in App Store Connect (or grant our team Admin access to submit it on your behalf).

App Store Connect Review Message — Guideline 2.1(b) Information Needed

Next Steps:

1. Once the **Paid Applications Agreement** is signed and banking/tax details are added, our team will register the In-App Purchase items.
2. We will upload the updated build with Apple StoreKit integrated and submit the review response.

Please let us know once the agreement has been accepted so we can finalize the submission immediately.

Thanks,
Vibe Swipe Development Team
